PROFILE

Results-driven Full Stack Software Engineer with a proven track record of designing, building, and delivering production-ready web and mobile applications. Expert at developing intuitive frontends and coupling them with robust database architectures, serverless handlers, and third-party APIs. Strong focus on end-to-end software delivery, system performance, and seamless AI integration.

EXPERIENCE

Full Stack Software Engineer

Drive to Own

2022 – 2024

- **Engineered and deployed** a cross-platform vehicle-rental and e-hailing mobile app using **React Native (Expo)**, optimizing start-up times and overall app performance.
- **Architected a fault-tolerant geocoding fallback subsystem** using AsyncStorage, preserving core location-based order flows during third-party API restrictions or Google Cloud billing locks.
- **Developed interactive map tracking features** utilizing React Native Maps, autocomplete search, and draggable pin reverse-geocoding to determine shop eligibility and radius matching.
- **Integrated secure payment architectures**, including Stripe SDK payment sheets and a secure, database-backed custom customer Wallet payment ledger system to support in-app balances.

Full Stack AI Solutions Developer

Qflit AI

2021 – 2022 Remote

- **Architected full-stack AI-driven SaaS chatbot applications** using **Next.js**, Node.js, and Python, enabling dynamic layout customization and custom prompt setups.
- **Engineered serverless Twilio WhatsApp and SMS webhooks** utilizing Deno Edge Functions, automating vendor dispatch routing and order responses.
- **Implemented real-time streaming interfaces** (Server-Sent Events / SSE) in React, reducing perceived user latency during large language model (LLM) output generation.

PROJECTS

- **eshop** — React Native (Expo) e-commerce system with Supabase backend, Stripe payments, custom customer wallets, and Twilio WhatsApp dispatching. (Live Web Admin)
- **Qflit AI** — Full stack AI chatbot builder platform using React, Next.js, and Python to construct custom GPT agents.
- **Swiftly.Africa** — E-hailing application with real-time driver tracking and matching.
- **Briing** — Peer-to-peer delivery platform featuring map coordinate geocoding and live backend updates.
- **O Learning** — AI-powered educational platform with full stack architecture.

CORE EXPERTISE

Mobile Development · AI Integration · System Architecture · User Authentication · API Design · Performance Optimization

SKILLS

Frontend

React · React Native · Expo · Next.js · HTML5 & CSS3 · Tailwind CSS

Backend & Database

Node.js · Python · PostgreSQL · Supabase · Firebase

Cloud, Tools & APIs

REST APIs · GraphQL · Stripe SDK · Twilio SDK · Deno Edge Functions · Git · Agile / Scrum

SOFT SKILLS

Teamwork & Mentorship · Technical Communication · Analytical Thinking · Agile Project Leadership

LANGUAGES

English (Fluent)
Shona (Native)

EDUCATION

Full Stack Developer Certificate

FNB App Academy

BSc Engineering (Incomplete)

University of Cape Town

2016 – 2019
